

Versatile web developer specializing in (but not limited to) front-end development, with a penchant for creating innovative solutions to unsolvable problems. 3+ years of experience building responsive, performant eCommerce and static sites using HTML, CSS, and Javascript. Constantly striving for self-improvement by staying updated with modern, cutting-edge technology.

Professional Experience

DYODE · Front-End Developer (08/2019 – Present)

- Develop pixel-perfect, responsive, and performant eCommerce sites using HTML5, CSS3/SASS, Javascript, React, and more.
- Optimize web page performance for high-traffic sites with complex codebases resulting in higher conversions while reducing bounce rates. (**FashionNova**, **Takeya**, **RidgeWallet**, etc.)
- Improve SEO metrics by implementing structured data based on Schema.org and increasing accessibility by ensuring ADA compliance according to WCAG guidelines.
- Track and measure site statistics to analyze user behavior with Google Tag Manager and Google Analytics; A/B testing with Google Optimize.
- Spearheaded multiple integrations and migrations of third-party apps into existing sites with RESTful web services.
- Collaborate in team environment (in-office and remote) using version control (Git); participating in Agile workflows using both Scrum and Kanban methodologies.
- Successfully manage multiple, high-level projects with critical deadlines to meet client and organization requirements.
- Identify and correct bugs leading to an improved UI/UX for end-users.

Freelance · Full Stack Engineer (06/2017 – 08/2019)

- Developed an interactive menu using dynamic routing, data persistence, and server-side authentication.
- Created a web app with CRUD functionality using the REST API, database structures, and authentication.
- Increased profit margins for client by setting up independent eCommerce store with custom design.
- Wire-framed personal portfolio and built with WordPress to utilize CMS capabilities.
- Designed a SPA, mobile-responsive movie app using Fetch API, ES6 Async/Await, and HTML5 Local Storage.

ProTechtion · IT Technician (09/2015 – 07/2019)

- Provided onsite and remote technical support to resolve various technical issue.
- Prevent possible security breaches by configuring firewalls and only allowing necessary access to data.
- Troubleshooting Active Directory and Microsoft Exchange servers.
- Responsible for onboarding new users and in charge of setting up workstations.
- Customize and create EHR templates using programming logic to meet end-user needs.
- Creating documentation for workflows to train employees on new procedures.
